DEVARANGAREDDY D

Full Stack / Frontend Developer

+91-9849393806 devarangareddy.dande@gmail.com Hyderabad, India

SUMMARY

I am a results-driven Full Stack / Frontend Developer with over 8 years of IT experience specializing in designing and developing scalable web and enterprise applications. My expertise spans across Angular, React JS, NodeJS, and cloud technologies, complemented by knowledge of SCADA/Ignition development and IoT solutions. I excel in delivering high-performance, user-centric applications within industrial automation and transportation sectors

EXPERIENCE

Frontend / Full Stack Developer

Seaton India IT Pvt. Ltd

04/2018 - 10/2020

- Developed web applications using Angular, React JS, HTML5, CSS3, Bootstrap, JavaScript, and jQuery
- Worked on DevOps operations, version control with Git, and CI/CD pipelines
- Integrated REST APIs using Postman and managed SQL databases for data persistence
- Implemented MVC architecture and deployed applications on Apache Tomcat server

Software Engineer

HCL Technologies

08/2016 - 03/2018

- Built enterprise web applications using Java, Spring, Hibernate, HTML, CSS, and JavaScript
- Deployed WAR files on Apache Tomcat, WebLogic, and WebSphere application servers
- Performed code quality analysis with SonarQube and managed builds with Maven/Gradle
- Used Docker to create images and containers for application deployment
- Monitored application logs for exceptions and performance issues

Software Developer

Cyient Limited

11/2020 Hyderabad

- Designed and developed application UI using Reactjs, NodeJS, HTML5, CSS3, Bootstrap, Angular JS, JavaScript, jQuery, and AJAX
- Created notification templates (ticket confirmation emails) using HTML5 and stored templates in the database
- Managed deployment, automation, and maintenance of AWS cloud-based production systems ensuring availability, performance, security, and scalability
- Implemented JSP forms and navigation using View Resolver; developed business logic and integrated dynamic pages with static designs
- Performed code reviews and UAT testing; managed SVN repository and coordinated release management
- Used Maven, Log4J, and JUnit for build management, logging, and unit testing

SKILLS

Gmail, Angular, React, Node.js, JavaScript, HTML, Bootstrap, jQuery, SCADA, IoT, AWS Cloud, Ajax, Java, Python, Java Spring, Hibernate, Servlets, JSP, AWS, EC2, VPC, ELB, S3, RDS, eBS, SQL, JDBC, Git, Maven, Gradle, Docker, Sonar, JIRA, SVN, Log4J, Apache Tomcat, Web Logic, WebSphere, Eclipse, Linux

PROJECTS

SCADA Upgradation

01/2024

Client: INFRAMARK - Cyient Limited

- Designed and developed Ignition Perspective applications with responsive WUI dashboards featuring 2D and 3D visualizations
- Implemented Python scripting for application logic, event handling, alarm processing, and real-time data operations
- Created and maintained Ignition tag structures (UDTs) and configured Tag Historian for historical process data storage
- Integrated Oracle/MySQL databases for alarms, events, and reporting functionalities
- Built responsive interfaces using HTML, CSS, Bootstrap, JavaScript, React JS, and Angular
- Used AJAX and jQuery for asynchronous data communication and dynamic UI updates
- Collaborated with stakeholders to gather requirements and deliver scalable industrial automation solutions

EDUCATION

Master of Computer Applications

Jawaharlal Nehru Technological University (JNTU)

Date period

PROJECTS

PW Asheville - Shop Floor Management Tools (Andon System)

01/2023 - 12/2023

Client: PWA USA - Cyient Limited

- Designed a shop-floor Andon application using Ignition SCADA, React JS, and Python to provide real-time machine status and production visibility
- Developed responsive web-based dashboards using Angular, React JS, HTML, Bootstrap, CSS, and JavaScript
- Implemented AJAX and jQuery for asynchronous data fetching and dynamic UI updates
- Integrated front-end with backend services using Java and Python for real-time data communication
- Designed MySQL database queries for event logging, downtime tracking, and historical reporting
- Used Git for version control; performed testing, deployment, and production support

IoT Platform (Cloud Platform & IoT Gateway)

05/2022 - 10/2022

Client: Cyient Ltd

- Developed UI for an IoT Cloud Platform and Gateway application enabling wired and wireless connectivity to sensors
- Designed front-end components using Angular, React JS, HTML, Bootstrap, CSS, and JavaScript for the IoT monitoring dashboard
- Implemented Python scripting for data collection, collation, and end-to-end business logic at the IoT device level
- Used Git for source control and collaborated with cross-functional teams for agile delivery

PROJECTS

UMB - Urban Mobility Backoffice (Revenue Management System)

11/2020 - 02/2022

Client: Cubic Transportation Systems (India) Pvt. Ltd. - Cyient Limited

- Designed and developed application UI using HTML5, CSS3, Bootstrap, Angular JS (1.x, 2.x), JavaScript, jQuery, and AJAX
- Created notification templates (ticket confirmation emails) using HTML5 and stored templates in the database
- Managed deployment, automation, and maintenance of AWS cloud-based production systems ensuring availability, performance, security, and scalability
- Implemented JSP forms and navigation using View Resolver; developed business logic and integrated dynamic pages with static designs
- Performed code reviews and UAT testing; managed SVN repository and coordinated release management
- Used Maven, Log4J, and JUnit for build management, logging, and unit testing
